➤ Brief Introduction

The Synway TEJ series are digital trunk interface boards newly developed for Asterisk system. Compared with other products in Synway AST series, the TEJ board has high integration. It is integrated with the capability of 64ms echo cancellation, eliminating the need of getting supports from extra modules or devices, bringing an obviously better effect of echo cancellation than other subseries in AST.

➤ Characteristic Features

1. PCI 2.2 Bus Support

Includes PCI 2.2 bus with burst data transmission rate up to 132 MB/s; PNP (plug and play) feature eliminates the need for jumper leads; universal PCI design supports 3.3V/5V PCI slot.

2. DMA Read and Write

The use of PCI-based DMA technique for data reading and writing helps minimize the cost of the host CPU.

3. Compatible with Asterisk

Entirely compatible with Asterisk at the hardware/driver level, with all source codes open.

4. RJ48C Jack

TEJ-1A/PCI, TEJ-2A/PCI and TEJ-4A/PCI boards respectively have 1, 2 and 4 RJ48C jacks which can either connect directly with digital trunks or convert to BNC connectors via a proper adapter, making connection easy and malfunctions rare.

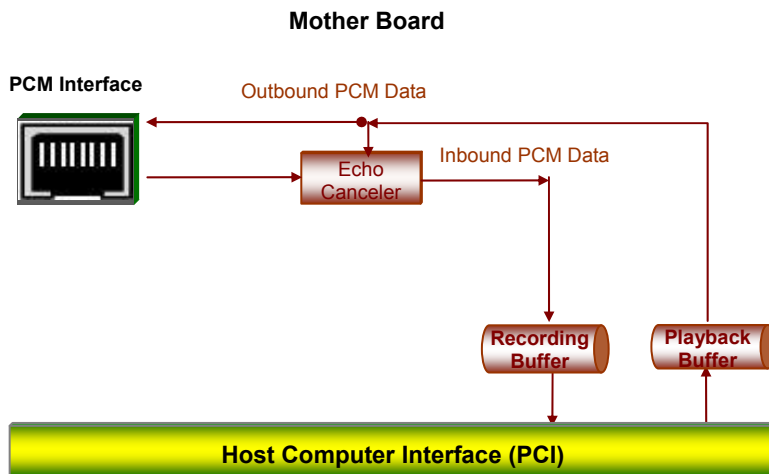

5. Echo Cancellation

The self-adaptive echo cancellation feature gives the board the capability of 64ms echo cancellation so as to effectively eliminate echoes under various conditions, canceling out the effect of voice playback on DTMF and busy tones detection, avoiding self-excited oscillation and howling, and minimizing the possibility of registering wrong DTMF and busy tones in a conference call, designed especially for VoIP application environments.

6. Voice CODEC Support

Supports A-law, μ -law codecs.
