

Synway's Unifies High-End IP-PBX FXS Analog VoIP Gateway & IP Phones for global partners

**Empowering Global Partners
with Professional UC Solutions**

UC IP-PBX

- Full unified communication: Voice, fax, conferencing, IVR
- High interoperability: Works with multi-solutions/3rd-party apps; highly customizable
- Large capacity: Up to 1,000 concurrent calls, unlimited users
- Flexible deployment: On-premise hardware or pure software; easy to install/admin

FXS Analog Gateway

- 4–960 FXO/FXS ports for SIP networks (high interoperability/reliability)
- Rich media processing: Fax, conferencing, multiple codecs
- Flexible architecture: Modular or standalone

IP Phones

- Clear stable calls: Dedicated DSPG chip (hardware optimization)
- High reliability: Firewalls + built-in network storm processing
- High efficiency: Compiled core language boosts chip performance
- Easy deployment: Auto-provisioning/boot for zero-touch batch setup

Typical Application

- One-Click Cross-Site Collaboration: Seamless voice/video/chat across;
- HQ and branches with single-number reachability, 50% Lower Telecom Costs: On-net calls between sites via private SIP;
- Trunking, bypassing PSTN charges. Mobile-First Workforce Enablement; Softphone apps with enterprise-grade security for remote/hybrid employees; Plug-and-Play Branch Deployment;
- Zero-touch branch office setup (<30 mins). Centralized Management + Local Survivability: Cloud control panel;
- Failover to local PBX during WAN outages;
